### Description:

The Virtual Mock Interviews event, organized by the IEEE Student Branch NBKRIST, was an enriching and interactive session designed to enhance the technical and problem-solving skills of our members. Led by Senior P. Jaswanth, an accomplished 2023 graduate and IT professional, this event provided participants with a simulated interview experience that closely mirrored real-world scenarios.

Each participant had the opportunity to engage in a 10-20 minute mock interview, during which the focus was on assessing and refining their knowledge of Data Structures and Algorithms (DSA) and other key technical skills. This wasn't just an evaluation—it was a learning experience, as P. Jaswanth provided personalized feedback to each participant. His insights and advice were invaluable, helping participants identify areas for improvement and offering strategies to enhance their performance in actual interviews.

The event was more than just a test of skills; it was a platform for growth and development. By participating in these mock interviews, members gained a clearer understanding of the expectations in the professional world and how they can better prepare to meet them. This event not only boosted the confidence of the participants but also strengthened the sense of community within the IEEE Student Branch, as members came together to support each other's professional journeys.
